Introduction

This catalog offers easy-to-use reference information for cutting parts and components, including OEM information for popular knives, sections and assemblies on hay and harvesting equipment for the AGCO family of hay equipment brands.

Updates you'll appreciate in this catalog include:

- Updated SCH Easy Cut II Kits for: combines, windrowers, mowers and mower-conditioners
- Replacement knife part number now listed with each SCH Easy Cut II conversion kit to make replacement knife ordering easier
- Detailed table of contents to aid in quickly locating the kit or part you need
- Updated part number index in the back that matches a specific part number to the corresponding page
- More photos added for easy part identification

SCH Easy Cut II Conversion Kits

The SCH Easy Cut II Conversion Kit is a universal cutting system that can be used in any type of crop in the world of agriculture. With the use of spring steel guards, completely hardened sections and roller guides, the Easy Cut II cutting system combines high quality and wear resistant components to provide the most innovative knife system in the market today. The Easy Cut II system eliminates the need for any adjustments, meaning less downtime and maintenance. SCH has specially designed each part to be universal. By doing so, each of the common components can be used on many different applications. The SCH Easy Cut II system provides a high cutting performance even in extreme harvesting conditions. Every platform on the market today can be updated to the SCH Easy Cut II Conversion Kit.

- **Superior Cutting System**

High quality, durable components make up each conversion kit

- **Universal Parts**

Nearly all components can be used on many different applications

- **Easy Handling**

Most conversion kits can be shipped with a small parcel carrier

- **No Adjustments**

With the box design of the guards, hold downs are eliminated, along with all the adjustments that come with them

- **Complete Application Range**

Conversion kits are available for all types of machines (windrowers/combines/haybines/mowers)

- **Choices**

Each conversion kit is available with roller guides or conventional wear plates

Features

- Universal components
- Spring steel guards
- High quality parts
- Sectional knife assembly
- Roller guides or wear plates

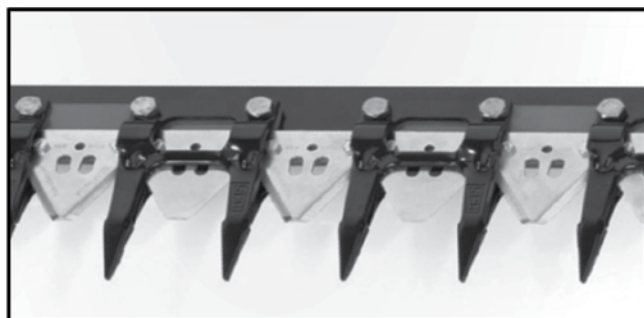

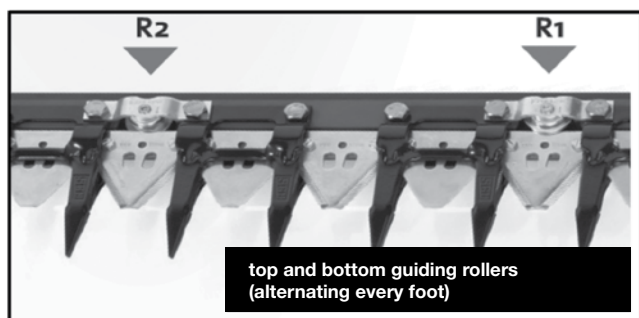

Benefits

- Reduced inventory
- Outlasts conventional forged guards
- Less downtime & maintenance
- Easy handling
- Choices to suit each harvest conditions

Keep It Genuine.

SCH Easy Cut II Conversion Kits

Roller Guide Conversion Kit

SCH roller guides greatly reduce the amount of force required from the knife drive to power the knife. On conventional cutting systems the knife runs against a wear plate. With the SCH roller guides, the knife runs against the top and bottom roller guides, allowing the knife to move more freely. This also reduces the amount of wear on the knifeback. Top and bottom roller guides are alternated every foot, allowing the knife to move more smoothly across the entire header.

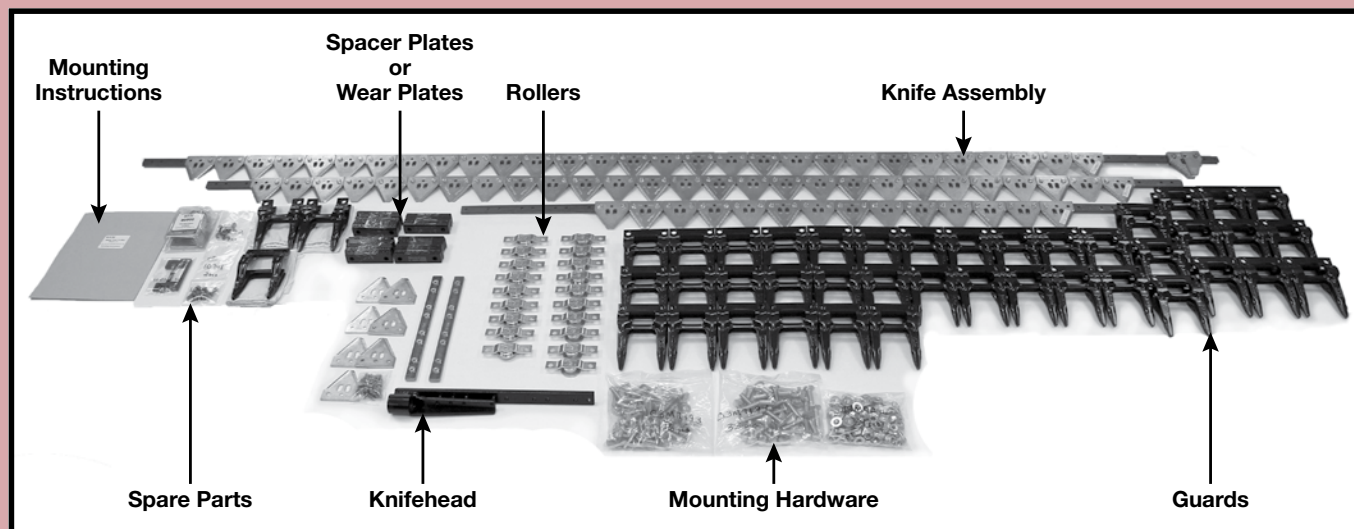

Wear Plate Conversion Kit

SCH wear plates have a similar concept as the conventional plates have in the market but require less adjusting. The hardened wear plates support the knifeback from behind, while the section rides on top of the wear plate. This feature combined with the box design of the guards creates a tight fitting knife and eliminates the need for hold downs and any adjustments.

What's Included?

Each kit includes all the necessary parts to convert your current header into an Easy Cut II cutting system. Along with this, each kit includes mounting instructions on how to assemble the kit. Every conversion kit also includes 2 extra standard guards and a 10-pack of sections with mounting hardware.

- Knife Assembly
- Roller Guides (if roller kit ordered)
- Knifehead
- Guards
- Spacer Plates or Wear Plates
- Mounting Hardware
- Spare Parts
- Mounting Instructions

SCH QUICK REFERENCE

Knife Assemblies

SCH knife assemblies are built as sectionalized knives. This allows for easy transportation of any length of knife by car, pickup, or parcel carrier. Each complete knife assembly consists of four primary components (the head piece, middle piece, tail piece, and connector kit). Through different combinations of these components, any length of knife can be made for any header. Each knife assembly can be packaged in a box that is a little less than 9' long, helping to eliminate shipping delays and damage during transport. The special connector bar used to join the knife segments allows the complete knife assembly to perform similar to a one-piece knife.

- **Easy Handling**

Each knife assembly is packaged in a box less than 9' long

- **Universal Components**

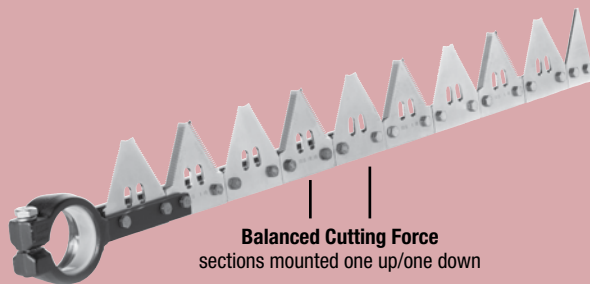

Knives are made of different knife segments to make almost any length

- **Quick Replacement**

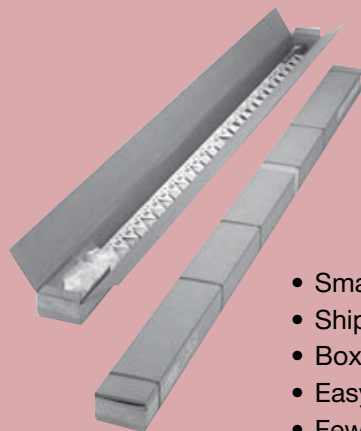

Each knife segment can be replaced by removing only a few bolts and nuts

- **High Strength Connector**

The connector bar is as strong as a piece of knifeback, acting like a single-piece knife

Balanced Cutting Force
sections mounted one up/one down

- Small Parcel Shippable
- Ship by car or pickup truck
- Box is less than 9' long
- Easy handling
- Fewer shipping delays

Features

- Sectional knife
- Universal components
- High strength connector
- Secure section mounting
- Alternated section mounting

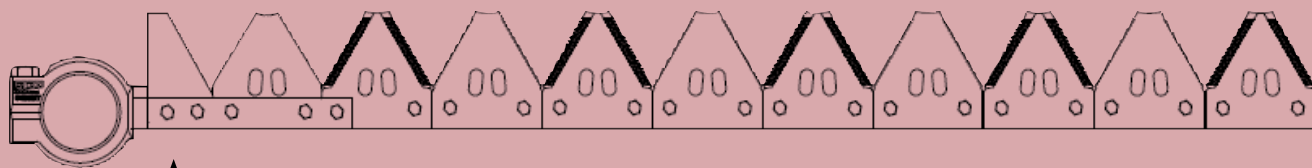

Benefits

- Flexible shipping options, easy handling
- Reduced inventory
- Performs like a single-piece knife
- Sections remain tight on the knifeback
- Balanced cutting forces

Keep It Genuine.

Knife Assemblies

Left Hand Replacement Knife

Right Hand Replacement Knife

Note: Replacement knives for double drive headers include the countersunk sections and hardware needed for the center overlap area.

- Left hand knives include 2 countersunk sections and assembly hardware
- Right hand knives include 3 countersunk sections and assembly hardware

See the Conversion Kits to reference the correct replacement knife needed for each application.

Note: Knifehead not included.
For illustration only.

Knife Assemblies

Left Hand Replacement Knife

Right Hand Replacement Knife

Note: Replacement knives for double drive headers include the countersunk sections and hardware needed for the center overlap area.

- Left hand knives include 2 countersunk sections and assembly hardware
- Right hand knives include 3 countersunk sections and assembly hardware

See the Conversion Kits to reference the correct replacement knife needed for each application.

Note: Knifehead not included.
For illustration only.

OEM Replacement Knife Assemblies

OEM Replacement Knife Assemblies

Listed below are sectionalized knives that are designed to be direct replacements for OEM knife assemblies. These knife assemblies are made to exact length to fit these models and do not include the knifehead.

AGCO DynaFlex Draper Series

(Challenger FDH, Gleaner 9250 DynaFlex, Massey Ferguson 9250 DynaFlex)

Knife Assemblies w/ 7-tpi Sections

Part No.	Description
ACP0094050	Knife Assembly 15' LH / 7-tpi sections (used on 30' DD)
ACP0094060	Knife Assembly 15' RH / 7-tpi sections (used on 30' DD)
ACP0094070	Knife Assembly 17.5' LH / 7-tpi sections (used on 35' DD)
ACP0094080	Knife Assembly 17.5' RH / 7-tpi sections (used on 35' DD)
ACP0094090	Knife Assembly 20' LH / 7-tpi sections (used on 40' DD)
ACP0094100	Knife Assembly 20' RH / 7-tpi sections (used on 40' DD)

Knife Assemblies w/ 11-tpi Sections

Part No.	Description
ACP0093990	Knife Assembly 15' LH / 11-tpi sections (used on 30' DD)
ACP0094000	Knife Assembly 15' RH / 11-tpi sections (used on 30' DD)
ACP0094010	Knife Assembly 17.5' LH / 11-tpi sections (used on 35' DD)
ACP0094020	Knife Assembly 17.5' RH / 11-tpi sections (used on 35' DD)
ACP0094030	Knife Assembly 20' LH / 11-tpi sections (used on 40' DD)
ACP0094040	Knife Assembly 20' RH / 11-tpi sections (used on 40' DD)

AGCO 5200 Series

Part No.	Description
ACP0132590	Knife Assembly 18' / 11-tpi sections
ACP0132600	Knife Assembly 22' / 11-tpi sections
ACP0132610	Knife Assembly 25' / 11-tpi sections
ACP0132620	Knife Assembly 30' / 11-tpi sections
ACP0132630	Knife Assembly 36' / 11-tpi sections

AGCO 8200 Series

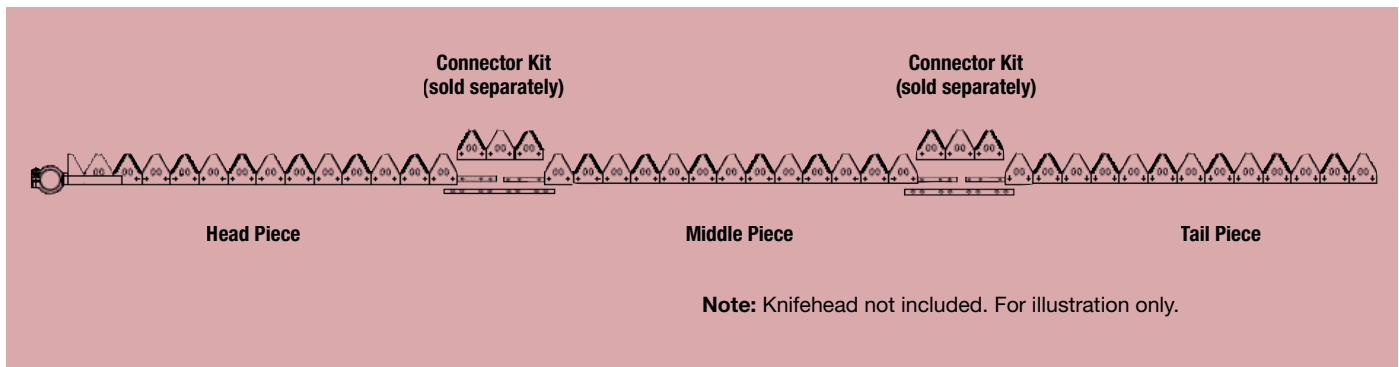

Part No.	Description
ACP0132550	Knife Assembly 20' / 7-tpi sections
ACP0132560	Knife Assembly 25' / 7-tpi sections
ACP0132570	Knife Assembly 30' / 7-tpi sections
ACP0132580	Knife Assembly 35' / 7-tpi sections

Knife Segments

Head Pieces w/ 7-tpi Sections (used on drive end of header)

Part No.	Description
ACP0126290	Knife #1 / 32 sections + 1/2 section (102.25")
ACP0124730	Knife #1 RH / 32 sections + 1/2 section (102.25")
ACP0126300	Knife #2 / 32 sections (100.25")
ACP0124670	Knife #2 RH / 32 sections (100.25")

Head Pieces w/ 11-tpi Sections (used on drive end of header)

Part No.	Description
ACP0126130	Knife #1 / 32 sections + 1/2 section (102.25")
ACP0124660	Knife #1 RH / 32 sections + 1/2 section (102.25")
ACP0126140	Knife #2 / 32 sections (100.25")
ACP0124650	Knife #2 RH / 32 sections (100.25")

Middle Piece w/ 7-tpi Sections

Part No.	Description
ACP0126310	Knife #3 / 27 sections (89.75")

Middle Piece w/ 11-tpi Sections

Part No.	Description
ACP0126150	Knife #3 / 27 sections (89.75")

Tail Pieces w/ 7-tpi Sections (used on end of knife assembly)

Part No.	Description
ACP0126320	Knife #4 / 28 sections (106.25")
ACP0126330	Knife #5 / 22 sections (82.25")
ACP0126340	Knife #6 / 14 sections (58.25")
ACP0126350	Knife #7 / 8 sections (34.25")
ACP0126360	Knife #8 / 4 sections (22.25")

Tail Pieces w/ 11-tpi Sections (used on end of knife assembly)

Part No.	Description
ACP0126160	Knife #4 / 28 sections (106.25")
ACP0126170	Knife #5 / 22 sections (82.25")
ACP0126180	Knife #6 / 14 sections (58.25")
ACP0126190	Knife #7 / 8 sections (34.25")
ACP0126200	Knife #8 / 4 sections (22.25")

Roller Guide Kits

Roller guide kits are a simple solution for end users that already have an SCH Easy Cut system with the conventional wear plates. These kits include the parts needed to convert an SCH wear plate cutting system to use the roller guides.

Each roller guide kit includes:

- Top & Bottom Roller Guides
- Spacer Plates
- Mounting Hardware
- Instructions

Note: When installing a new roller guide kit on an existing SCH cutting system, a new knife assembly is recommended.

AGCO

Part No.	Description
ACP0125770	AGCO 8000 (16') / Easy Cut II
ACP0125780	AGCO 8000 (18') / Easy Cut II
ACP0125790	AGCO 8000/8200 (20') / Easy Cut II
ACP0125800	AGCO 8000/8200 (25') / Easy Cut II
ACP0125810	AGCO 8000/8200 (30') / Easy Cut II
ACP0125820	AGCO 8200 (35') / Easy Cut II

Case IH

Part No.	Description
ACP0125830	Case IH 1020 (20') / Easy Cut II
ACP0125840	Case IH 1020 (22.5') / Easy Cut II
ACP0125850	Case IH 1020 (25') / Easy Cut II
ACP0125860	Case IH 1020 (30') / Easy Cut II

Honey Bee

Part No.	Description
ACP0125870	Honey Bee (25') / Easy Cut II
ACP0125880	Honey Bee (30') / Easy Cut II
ACP0125890	Honey Bee (36') / Easy Cut II
ACP0125900	Honey Bee (39') / Easy Cut II
ACP0125910	Honey Bee (40') / Easy Cut II
ACP0125920	Honey Bee (42') / Easy Cut II
ACP0124540	Honey Bee (42' Double Drive) / Easy Cut II

John Deere

Part No.	Description
ACP0125930	John Deere 200/900 (20') / Easy Cut II
ACP0125940	John Deere 200/900 (22') / Easy Cut II
ACP0125950	John Deere 200/900 (25') / Easy Cut II
ACP0125960	John Deere 200/900 (30') / Easy Cut II
ACP0125970	John Deere 930D (30') / Easy Cut II
ACP0125980	John Deere 936D (36') / Easy Cut II
ACP0125990	John Deere 600 Auger (20') / Easy Cut II
ACP0126000	John Deere 600 Auger (25') / Easy Cut II
ACP0126010	John Deere 600 Auger (30') / Easy Cut II
ACP0126020	John Deere 600 Auger (35') / Easy Cut II

MacDon

Part No.	Description
ACP0126030	MacDon 972 (21') / Easy Cut II
ACP0126040	MacDon 972 (25') / Easy Cut II
ACP0126050	MacDon 972 (30') / Easy Cut II
ACP0126060	MacDon 972 (36') / Easy Cut II

Easy Cut II Guards

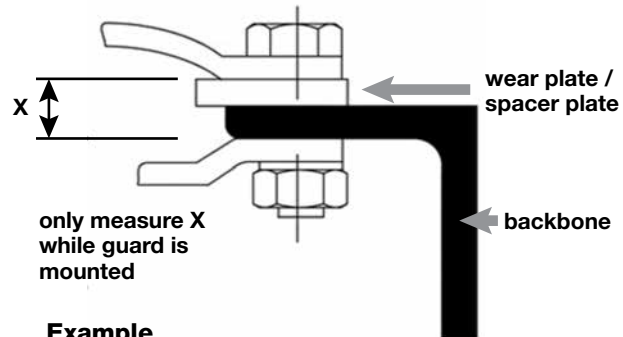

The SCH guard is made of high quality spring steel material. They are specially hardened for an extremely hard and wear-resistant surface. While conventional forged guards only mount on one side of the cutterbar, the SCH guard is mounted on both the top and bottom of the cutterbar. Due to this, the guards are protected from impacts on all sides, increasing its durability. The beveled top and bottom cutting edges balance the knife movement and help hold the crop more firmly instead of pulling it through the guard. Because of its beveled design, the hardening of the cutting edge is increased by about 30%. With the development of the new Easy Cut II system, the guard tips are now more blunt to help reduce the risk of spearing crop and other residue.

Identify Your Guard

Mark	Guard Type	Guard Color
2	12mm Guard	Black
4	14mm Guard	Red
7	17mm Guard	Gray

Example

		wear plate / spacer place		dimension X
6mm	+	6mm	=	12mm
9mm	+	5mm	=	14mm

Features

- Spring steel construction
- Double cutting edges
- Top and bottom mounting
- Universal fitting
- Special hardening process

Benefits

- Reduced breakage (less downtime)
- Balanced knife guidance
- Increased protection from all impacts
- Less inventory to carry
- Extended wear resistance

Keep It Genuine.

Easy Cut II Guards

Standard Guard (primary guard used on platform)

Part No.	Description
71443947	Standard Guard 12mm / Easy Cut II (black)
ACP0125580	Standard Guard 14mm / Easy Cut II (red)
ACP0125590	Standard Guard 17mm / Easy Cut II (gray)

Open-Top First Guard (used in the knifehead area)

Part No.	Description
71443948	First Guard 12mm Open-Top / Easy Cut II (black)
ACP0125550	First Guard 14mm Open-Top / Easy Cut II (red)
ACP0125540	First Guard 17mm Open-Top / Easy Cut II (gray)

Open-Top Center Guards

(used in the overlap area on double drive platforms)

Part No.	Description
71443949	Center Guard 12mm Open-Top / Easy Cut II (black)
ACP0125560	Center Guard 14mm Open-Top / Easy Cut II (red)
ACP0125530	Center Guard 17mm Open-Top / Easy Cut II (gray)

Triple Guards

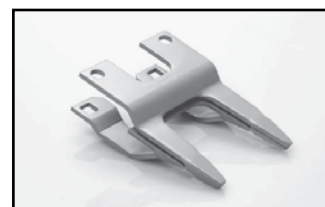

(used on some platforms where OEM uses them)

Part No.	Description
ACP0125600	Triple Guard 12mm / Easy Cut II (black)
ACP0125610	Triple Guard 14mm / Easy Cut II (red)
ACP0125620	Triple Guard 17mm / Easy Cut II (gray)

Specialty Guards

Part No.	Description
ACP0125700	First Guard 17mm / Easy Cut II (gray)
ACP0125570	Standard Guard 12mm w/ Cut-Out Bottom / Easy Cut II (black)
ACP0125740	First Guard 12mm Open-Top for Versatile 4700 (black)

Check your guard wear!!

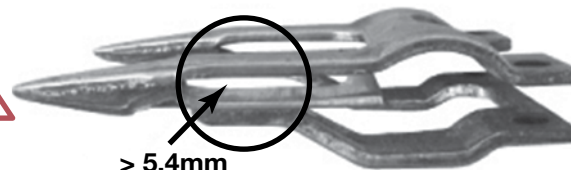

Guards should be checked regularly for wear.

A new guard will have a gap of 0.15" – 0.17" (3.8mm – 4.2mm).

Gaps worn over 0.21" (5.4mm) start causing the knife to float. The rounded cutting edges will also require greater power requirements from the knife drive.

4.0 – 5.4mm

> 5.4mm

Part Numbers in **BOLD** can only be ordered on your Daily Stock Order
Part Numbers starting with ACP are ship-direct and can only be ordered on Promo

Keep It Genuine.

Easy Cut I Guards (2010 & prior)

Standard Guard (primary guard used on platform)

Part No.	Description
71386906	Standard Guard 12mm / Easy Cut I (black)
ACP0132920	Standard Guard 14mm / Easy Cut I (red)
ACP0132930	Standard Guard 17mm / Easy Cut I (gray)

Open-Top First Guard (used in the knifehead area)

Part No.	Description
71386905	First Guard 12mm Open-Top / Easy Cut I (black)
ACP0132960	First Guard 14mm Open-Top / Easy Cut I (red)
ACP0132970	First Guard 17mm Open-Top / Easy Cut I (gray)

First Guard (used in the knifehead area)

Part No.	Description
ACP0132940	First Guard 12mm / Easy Cut I (black)
ACP0132950	First Guard 14mm / Easy Cut I (red)
NLA	First Guard 17mm / Easy Cut I (gray) / Use ACP0125700

Open-Top Center Guards (used in the overlap area on double drive platforms)

Part No.	Description
71420466	Center Guard 12mm Open-Top / Easy Cut I (black)
ACP0133010	Center Guard 14mm Open-Top / Easy Cut I (red)
ACP0133020	Center Guard 17mm Open-Top / Easy Cut I (gray)

Triple Guards (used on some platforms where OEM uses them)

Part No.	Description
ACP0132980	Triple Guard 12mm / Easy Cut I (black)
ACP0132990	Triple Guard 14mm / Easy Cut I (red)
ACP0133000	Triple Guard 17mm / Easy Cut I (gray)

Easy Cut I vs Easy Cut II Guard Chart

Description	Easy Cut I Version	Easy Cut II Version
Standard Guard 12mm	71386906	71443947
Standard Guard 14mm	ACP0132920	ACP0125580
Standard Guard 17mm	ACP0132930	ACP0125590
First Guard 12mm	ACP0132940	–
First Guard 14mm	ACP0132950	–
First Guard 17mm	NLA (use ACP0125700)	ACP0125700

Roller Guides

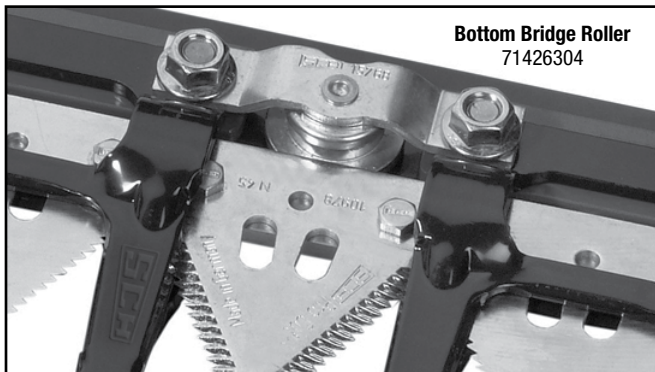

SCH roller guides offer a high performance alternative to the standard wear plates that are used on many machines in the market today. With most knife systems, the knife runs against a wear plate. Today's wider platforms and the demand for a better cutting performance leads to more wear on the knifeback and wear plates. The SCH roller guides reduce the friction on the knifeback and allows the knife to run more smoothly. This action also results in less knife load and power requirements for the knife drive or wobble box.

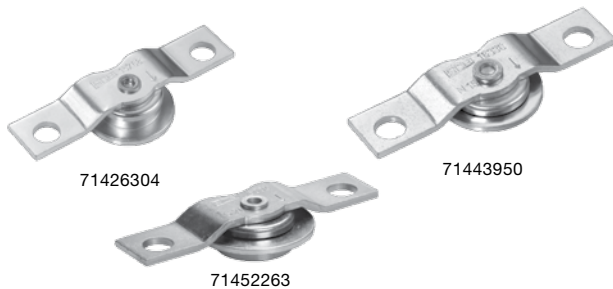

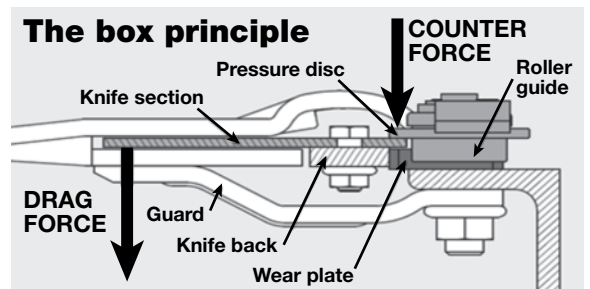

Bottom Bridge Roller
reduces vibration and wear of knifeback

Top Bridge Roller
holds knife straight to prevent section from tipping downward

- Made with a hardened roller, sealed bearing and a cap to keep the dirt out.
- Upgrade your existing SCH wear plate cutting system with roller guides.
- Replace your OEM cutting system with an SCH Easy Cut II conversion kit.

Roller Guides
(used on SCH system instead of conventional wear plates)

Part No.	Description
71426304	Bottom Roller Guide
71443950	Top Roller Guide
71452263	Overlap Roller Guide for Double Drive Headers
ACP0124460	Spacer Bushing for 71452263 roller (2 used per roller)

Features

- Less knifeback wear and breakage
- Reduced drive force needed
- Less platform vibration
- Easier knife insertion
- Smooth knife movement

Benefits

- Nonstop harvesting
- Decreased fuel consumption
- Efficient cutting, drive faster
- Save time in the field
- Increased cutting performance

Part Numbers in **BOLD** can only be ordered on your Daily Stock Order
Part Numbers starting with ACP are ship-direct and can only be ordered on Promo

Keep It Genuine.

Pro Cut Sickle Sections

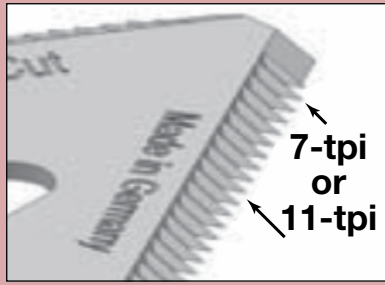

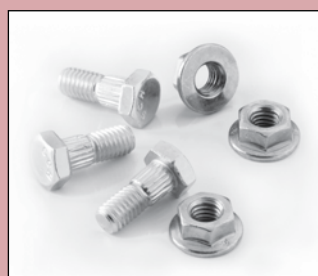

The greatest damage to knives and guards can be caused by bent sections. Most sections on the market today are only hardened on the serrations, allowing the sections to bend when an object is hit. The Pro Cut section is completely heat treated, resulting in an extremely tough section. Instead of the section bending and damaging the guards, Pro Cut sections will break when they hit large stones or other objects. This reduces damage caused to the guards. Special serrated bolts are used to connect the section to the knifeback. The shoulder of the bolt wedges itself in the section and knifeback, ensuring a tight fit of the section in the back of the knife.

Cut-Outs
help clean residue buildup and also reduces section weight

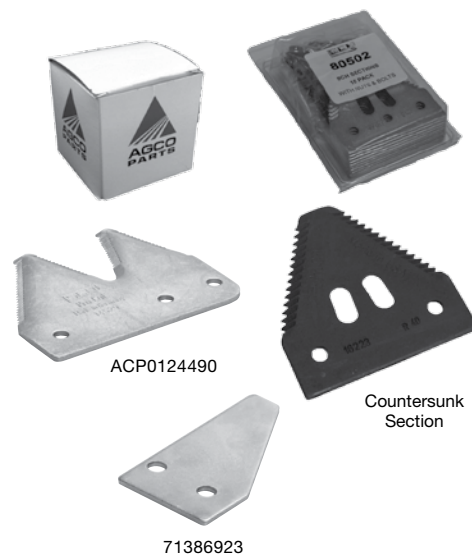

Various Serrations
7-tpi or 11-tpi serrations available

Secure Fit
Serrated shoulder of bolt securely fastens section to knifeback

Pro Cut Sections (used on SCH cutting systems)

Part No.	Description
71386924	Pro Cut Section / 7-tpi Serration (25 pcs/box)
ACP0124930	Pro Cut Section / 7-tpi Serration (pkg. 10)
ACP0126100	Section & Hardware Package / 7-tpi (10 sections & hardware)
71421197	Pro Cut Section / 11-tpi Serration (1 pc/box)
ACP0124920	Pro Cut Section / 11-tpi Serration (pkg. 10)
ACP0126120	Section & Hardware Package / 11-tpi (10 sections & hardware)
71421198	Pro Cut Countersunk Section / 11-tpi Serration (1 pc)
ACP0124500	Pro Cut Countersunk Section / 11-tpi Serration (pkg. 10)
71420464	Pro Cut Countersunk Section / 7-tpi Serration (1 pc)
ACP0124510	Pro Cut Countersunk Section / 7-tpi Serration (pkg. 10)
71386923	Half Section (1 pc)
ACP0124490	Section and a Half (1 pc)
ACP0126110	Section Bolt & Nut Package (50 pcs each)

Features

- Completely hardened section
- Sections break, not bend
- Cut-outs in center of section
- Secure mounting
- Varied teeth serrations

Benefits

- Extreme durability
- Reduced guard damage
- Cleans guards & reduces weight
- Sections won't come loose
- Used for different crop conditions

Spacer Plates

Spacer plates are used in conjunction with the roller guides. A spacer plate is mounted between the top of the guard and cutterbar to gain the necessary clearance for the knife to be installed and run properly. The combination of the cutterbar thickness and the spacer plate thickness determines which type of guard is used on each platform (12mm / 14mm / 17mm).

Spacer Plates (used on SCH cutting systems with roller guides)

Part No.	Description
71440550	Spacer Plate 4mm Thick / 2-Hole (gray)
ACP0125410	Spacer Plate 4mm Thick / 3-Hole (gray)
ACP0125420	Spacer Plate 4mm Thick / 6-Hole (gray)
ACP0125430	Spacer Plate 5mm Thick / 2-Hole (blue)
ACP0125440	Spacer Plate 5mm Thick / 3-Hole (blue)

Keep It Genuine.

Wear Plates

SCH wear plates have a similar concept to the conventional cutting systems on the market today but require less adjusting. The hardened wear plates support the knifeback from behind, while the section rides on top of the wear plate. This feature along with using the SCH guard creates a tight fit and eliminates the need for hold downs and any adjustments.

Wear Plates (used on SCH cutting systems with wear plates)

Part No.	Description
ACP0125650	Wear Plate 4mm Thick / 2-Hole (tan)
ACP0125680	Wear Plate 4mm Thick / 3-Hole (tan)
ACP0124900	Wear Plate 4mm Thick / 4-Hole (tan)

Knife Connector Kits

- **Simple Installation**

Simply bolt the connector bar at the knife joint.

- **Durable Construction**

Each connector bar is as strong as the knifeback, allowing the knife to perform like a single piece knife.

- **Dual Purpose**

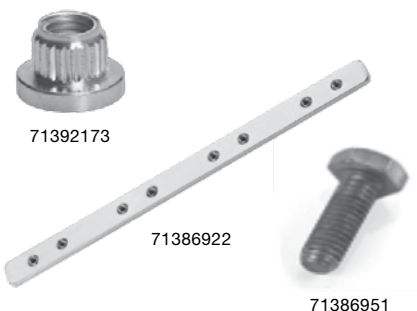

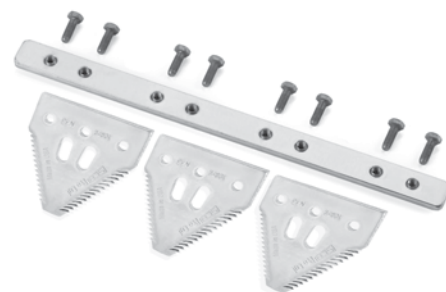

Along with connecting knife joints, the connector bar kit can also be used as a repair splice to fix a broken knife.

Connector Kits

Part No.	Description
ACP0125750	Connector Kit w/ 7-tpi Sections (used for 1 connection)
ACP0124530	Connector Kit w/ 11-tpi Sections (used for 1 connection)

Components

Part No.	Description
71392174	Splice Kit (includes connector bar, bolts, and extra inserts)
71386922	Connector Bar
71392173	Threaded Insert for Connector Bar
71386951	Bolt M6x16 w/ Loctite

Knifeheads

Knifeheads provide the power transfer from the knife drive to the knife. The proper connection is important for the entire cutting force of each knife. Using the correct knifehead helps ensure the knife systems reliability, running smoothness and service requirements. SCH knifeheads are designed to fit each application. Whether your header uses an SCH Pro-Drive or an OEM knife drive, the correct knifehead can make a difference.

AGCO

Part No.	Description
ACP0126230	Knifehead AGCO 5000 Draper
700735454	Knifehead AGCO 5200 Draper

Case IH

Croplifters

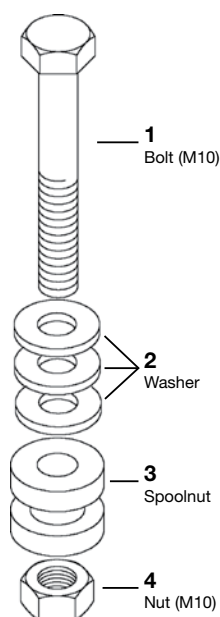

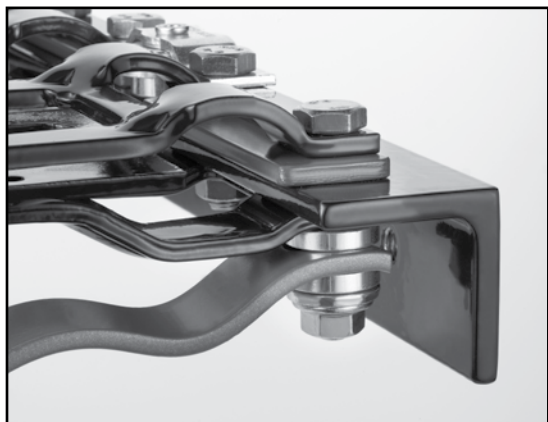

Schumacher croplifters are renowned worldwide for their quality and longevity. That is why all major combine manufacturers equip their headers with original Schumacher croplifters. Together with constant improvements, years of design innovations and using the best available specialty steels, SCH always assures a quality product. All Schumacher croplifters are designed for the optimal fit to each header. In addition, the croplifter connection and connecting spool allow for additional fine adjustments. The result is the optimal fit to suit your harvest conditions.

ASK Series Croplifters

- slimProfile prevents the reel tines from getting caught when reversing the reel.
- Improved concave sliding skid allows for better sliding dynamics.
- Look for the SCH stamp, made to the highest standards.

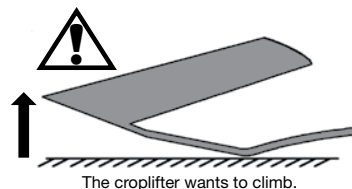

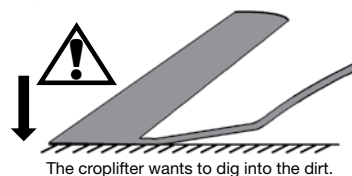

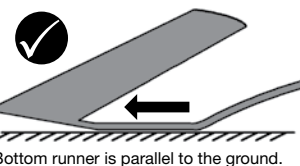

- Unique spring clip secures the croplifter to the guard at three different heights.
- Mounting bracket allows the croplifters to be mounted or taken off in seconds.

Croplifter Mounting

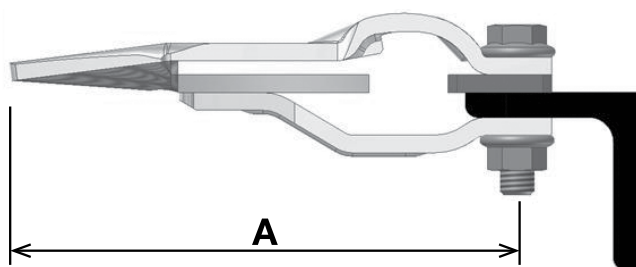

To assure the best performance of the croplifter, the bottom runner must be parallel to the ground when the platform is in cutting position.

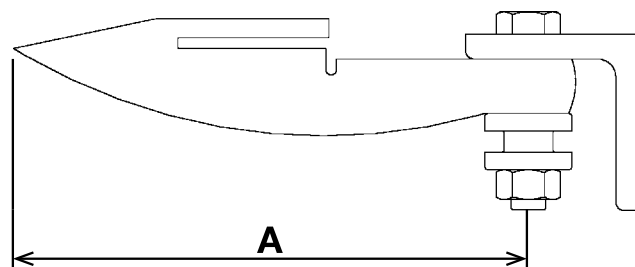

What Croplifter Do I Need?

The different types of croplifters are based on the guard that is used on each machine. Matching the correct croplifter for each guard helps ensure the optimal mounting and performance of the croplifter. Using the incorrect croplifter can result in extra wear and possible loss of the croplifter. The information below can help in determining which croplifter is correct for each guard.

SCH Easy Cut Guard

Forged Guard

Measurement "A"

Distance from the tip of the guard to the center of the guard mounting bolt.

Measurement "A"		Croplifter Model	AGCO Part No.
inches	mm		
5.4" – 5.8"	138mm – 146mm	ASX-100/5	ACP0125240
5.7" – 5.8"	145mm – 153mm	ASX-100	ACP0125520
6.1" – 6.4"	154mm – 163mm	ASX-120	ACP1025630
6.5" – 6.7"	164mm – 170mm	ASX-127	ACP0125640

Grain Croplifters

Part No.	Description
*ACP0125240	Croplifter ASX-100/5
*ACP0125520	Croplifter ASK-100 (fits SCH guards)
*ACP0125630	Croplifter ASK-120
*ACP0124520	Croplifter ASK-121 (fits Case IH guard 334305A1 & 87442324)
*ACP0125640	Croplifter ASK-127
626299C1	Croplifter CM-300 (universal croplifter)
ACP0124820	Spoolnut for 10mm Bolt
ACP0124810	Spring Clip for Croplifter

*Spoolnut ACP0124820 is required to mount the croplifter. This item is not included with the croplifter and is sold separately.

Pro Flex Lifter

Croplifter finger can be easily seen in the crop due to white colored material

High quality lifter finger ensures longer life and reduced distortion

Croplifter finger is adjustable in length

Specially designed slot ensures a tight fit on all popular guards

Finger angle is also adjustable

Schumacher Pro Flex Lifters combine simple design with durability for your easy pulse crop harvest.

- Compact design and easy mounting
- Guarantees a tight fit on all types of guards
- Length and angle of lifter finger is fully adjustable to allow for optimal working conditions
- White color of lifter finger provides maximum visibility in all crop conditions
- High quality material ensures extended durability of the lifter finger

ONE 4 ALL

The Pro Flex Lifter is designed to fit both SCH guards and conventional forged guards

SCH Pro-Drive Knife Drive

Almost all conventional cutterbar knife drives have a stroke of between 3" and 3-1/3". When a difficult crop loads the cutting knife, the knife rarely travels the full length of the stroke. The SCH Pro-Drive system eliminates this problem. Built using planetary gears, the drive produces absolute linear knife movement. Even under extreme cutting conditions, the drive force will remain constant. The motion distance (knife stroke) remains constant and doesn't vary, even after many hours of use. SCH Pro-Drives are available in either vertical or horizontal versions to fit an assortment of applications.

- **Higher Cutting Speed**
- **Absolute Linear Knife Movement**
- **Longer Harvesting Days**
Crops can be cut when there is dew on the ground.
- **Low Maintenance**
Uses grease lubrication instead of conventional oil bath.
- **Easy Knife Change**
Simply remove two bolts and a knife can be changed.
- **Compact Design**

Pro-Drive Replacement Parts

Part No.	Description
71416424	Head Connector 27mm w/ Ring & Bolts (Maintenance Free)
700719594	Nylon Ring for Pro-Drive Knifeheads
700722148	Bottom Cover of Knifehead Bearing
700722149	Bearing for Head Connector

SCH Pro-Drive Conversion Kit

Available for 800-8000 Series Flex Heads and 700-7000 Series Rigid Heads

What's the difference?

- Grease Lubricated
- Reduced Vibration
- Complete Linear Movement
- Exact Alignment with the Knife

Each Kit Includes:

- SCH Pro-Drive
- Mounting Bracket
- Drive Pulley
- Extra Nylon Ring for Knifehead
- Knifehead (ACP0125230)
- Hardware Kit for Mounting
- Instruction Sheet

700-7000 Series Rigid Heads

Part No.	Description
ACP0126390	PD Conversion Kit 700-7000 Rigid Heads

Note 1: Must change drive belt to AGCO Part No. 71322828

800-8000 Series Flex Heads

Part No.	Description
ACP0126380	PD Conversion Kit 800-8000 Flex Heads

Note 1: Must change drive belt to AGCO Part No. 71322828

Note 2: The following parts are recommended to support the drive end. (sold separately)

2 Outer Wing Assembly (71415262)

1 Stabilizer Assembly (059362N2)

1 Skid Pad Strap (71415649)

1 Skid Plate (6209692M92)

Support Block (71312736)

Instruction Sheet (71398299)

Radura Disc Mower Knives

Radura disc mower knives have been used throughout the world for over 50 years. Their exceptional quality and durability are the reason why so many professional users, OEMs, or hobby farmers trust Radura disc mower knives for their machines. Whether you're cutting hay, alfalfa or grass, Radura disc mower knives help you get the job done.

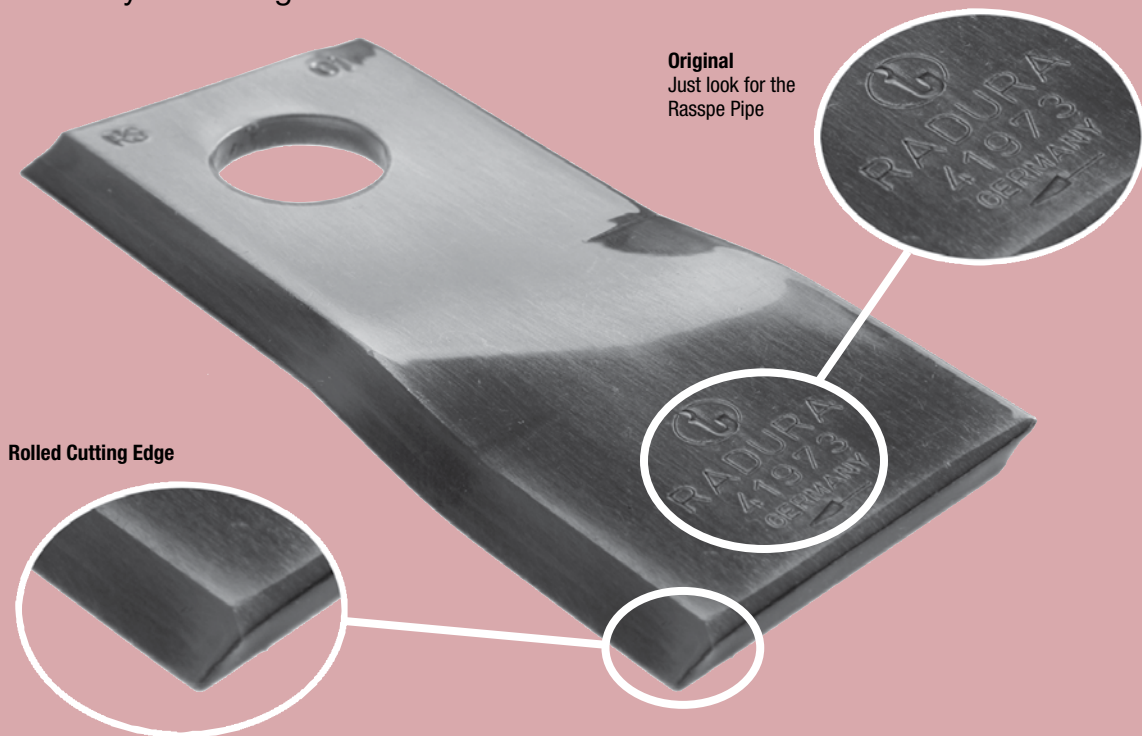

The primary difference between Radura disc mower knives and other blades in the market is the way they are made. Radura knives feature a rolled cutting edge, whereas most other competitors grind their cutting edge. This grinding method weakens the steel and causes the knife to chip and wear prematurely. With the special cold rolled process used on the cutting edge of Radura blades, the results are a more wear resistant edge that maintains its sharpness longer.

Each batch of Radura rotary disc mower knives are subjected to a rigorous quality control program, ensuring they meet DIN 11250 / ISO 5718-2 standards. These quality inspections ensure Radura knives are of the highest quality standards and guarantees a maximum degree of safety.

The Radura Advantage!!

- **Cold Rolled Cutting Edge**
Superior cutting quality and wear resistant
- **Manufactured to DIN 11250 / ISO 5718-2 Standards**
Assures a safe, quality product
- **Various blade styles available**
Choices to suit your cutting needs
