

# Parts On Demand (POD) Program

## The AGCO POD Program: It's More Than Just A Cabinet!

With Genuine AGCO Parts stocked at your location, you'll spend more time in the field and less time at the counter. The AGCO POD Customer Program provides five great benefits to help you improve your operational efficiency both at your shop and in the field.

### Stay Organized

An AGCO POD Cabinet will look great in your shop, but it's best value is keeping your parts organized and right where you need them.

### Save Money

Ask your AGCO Parts Professional how you can save money by stocking critical Parts On Demand. Coupled with fewer trips to the dealership, you'll experience all around savings.

### Less Downtime

Stocking parts on site keeps downtime to a minimum with Parts On Demand. Less downtime means more money in your pocket.

### Less Waiting

Your AGCO Dealer can maintain a customized parts list for your operation, which makes stocking and re-ordering easy. Order off your list when it is convenient for you, and stay one step ahead of each season with your cabinet fully stocked.

### Showcase your Brand

With customizable colors and logos, your cabinet will proudly display your brand loyalty, while at the same time it is designed with your shop in mind, made in the USA, and fully welded and assembled to get to work right when you receive it.

Ask your AGCO Dealer how you can put the Parts On Demand program to work for your operation!
