**A joule is** a measure of electrical energy. Power Wizard energizers are rated in output joules, indicating the energy on the fence wire or how *powerful* the fence energizer is. The higher the joule rating, the more powerful the fence energizer. The energizer selection guide in this brochure will help you compare energizer units based on your acreage, standard miles of wire, type of livestock and the joule rating.

Power Wizard's **power source options** include plug-in, battery and solar powered electric fence energizers. 110V plug-in energizers are the preferable option if a power outlet is nearby. They are a great value as they provide the most power (joule output). For more remote areas, a battery or solar energizer is a great solution.

**The new FarmPro line of "smart" energizers** include remote control ready energizers with built-in fence diagnostics, AC and/or DC powered energizers and a 24 joule energizer with an LED fence voltage indicator.

### Low Impedance vs. Ultra Low Impedance

What is the difference between low impedance and *ultra* low impedance?

**Low impedance** refers to the technology that enables the fence charger to deliver an effective shock even when moderate vegetation is in contact with the fence.

**Ultra low impedance** fence chargers deliver an effective shock through the most challenging conditions – heavy weeds and wet or snow covered ground.

Unless you plan to manicure the grass and weeds beneath your fence for the full length of your acreage, an *ultra* low impedance charger is the *best solution* to ensure your livestock are contained every day, regardless of the weather conditions.

Power Wizard's shock technology is number one in the industry for delivering *ultra* low impedance for the full length of your fence.

### What is a Ground System?

The “ground system” is a series of highly conductive rods driven into the soil and then connected by wire to the ground terminal of your fence energizer. The ground system collects electrons from the soil to complete the circuit needed for delivering an effective shock to your animals.
