79024007

AGCO Planter Talc helps maintain seed flow by minimizing seed treatment buildup on seed meter components.

79021832

AGCO Seed Flow Lubricant is a graphite powder used in the planter seed hopper to help reduce friction, allowing seeds to flow smoothly and reduce planter part wear.

Link Plate Pitch Holes go through a 3-step process to ensure a uniform press fit.

Bushing Orientation aligns the formed bushing so the seam does not contact the pin during a load.

Case-Hardened Pins provide the perfect balance between wear resistance and durability.

Preloading sets each part within the chain to eliminate elongation.

Shot Peening imposes an internal stress for improved strength.
