**AT AGCO WE'VE BEEN
FITTING AND RECOMMENDING
CAMSO TRACKS FOR MANY YEARS.**

**WE BELIEVE THEY'RE
SIMPLY THE BEST IN THE MARKET
FOR QUALITY, PERFORMANCE AND VALUE.**

Keeping your machines in the best condition is a priority for you. We understand that cost is an important part of your decisions and we listened when you said that you were having to choose between affordability and quality.

We've worked hard to review our prices across all tracks and all markets to arrive at a new, fairer, clearer and affordable pricing structure.

That means you can now choose the genuine products, fitted by accredited mechanics without having to compromise.

Your dealer has always been the best place to service and repair your AGCO machine. You can now choose them, confident that your wallet won't be the one to suffer.

CHOOSING THE RIGHT TRACK

» *Select the right track type for your applications and ground conditions.*

» *Get them fitted and professionally tensioned by your AGCO dealer.*

» *Enjoy the best performance from your machine, with maximum working life and reliability.*

GENERAL AG

Suitable for most standard agricultural applications.

- Provides optimal track life and durability in normal use.
- Designed for most primary and secondary tillage applications and field conditions.

EXTREME AG

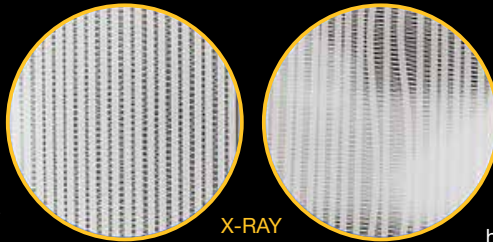

Carcass engineered for high-hour usage and the most demanding applications.

- Designed for aggressive tillage applications, roading, side slopes, abrasive soil conditions.

90° OUTER CABLE ■
45° CABLE ■
135° CABLE ■
0° CABLE ■
90° INNER CABLE ■

Camso's unique single-cure process ensures uniform tension distribution and minimises downtime due to carcass tearing.

Competitor's molding process allows material displacement; greatly reducing resilience and hampering performance.

LOW PROFILE

Ideal solution in hay fields to maximise weight distribution and minimise soil disturbance.

- Minimal berming.
- Provides 40% more tread bar than standard tracks.
- Surface contact is more than 100% larger than an equivalent standard track.

EXTREME APP

Superior track life and ride for high roading needs.

- Added tread volume with optimized tread bar geometry.
- Enhanced carcass strength for better ride quality.
- Provides up to 10% more surface area for extended track life.

SPECIAL APP

Built to withstand the toughest commercial or agricultural scraper conditions with maximum service life.

- The largest cable on the market.
- Trackshield carcass technology allows 20% more resistance to puncture than General Ag.

CUSTOMER QUOTE

“Last year I fitted different tracks, they were cheaper and I figured I’d be saving hundreds of pounds.”

They’ve been nothing but trouble, they’ve worn badly and caused problems with the undercarriage parts.”

I’ve learned the hard way that you get what you pay for – I’m only ever fitting CAMSO tracks from now on.”
