Tractor Weights

Reasons why cast iron wheel weights should be used instead of liquid ballast:

- ✓ Most wheel, tire and tractor manufacturers, including **Michelin**, **Goodyear**, **Firestone** and **Titan**, recommend cast iron for ballast weight.
- ✓ Less damage to power train and steering system.
- ✓ Power hop tendency is significantly decreased.
- ✓ Tires are less difficult to service and repair.
- ✓ Ride comfort is increased due to increased air cushion.
- ✓ Tires are less vulnerable to impact and damage.
