Variable Chamber Round Baler Belting	700730687	BALE FORMING BELT	2846 / 2846A RND BALER, RB46C / RB46CA RND BALER, RB56 RND BALER, RB56C 5X6 RND BALER		Features: All competitors offer only polyester/nylon outer plies - polyester is a cheaper raw material than nylon. POLYESTER vs NYLON = Polyester is a strong material, but brittle in comparison to nylon. Polyester cords do not bend, stretch, or retain memory - polyester snaps under extreme stress. Nylon is a strong material that does bend, stretch, and it retains memory - nylon's elastic properties allow it to bend and stretch under extreme stress and then retract back to it's original shape.
