Loader Light™

Lighting Up the Dark

LoaderLight™ is a LED loader illumination kit for dealer installation. The especially designed lights are integrated under the knee plates to follow the position of the arm making it especially useful when working with pallet forks.

A perfect tool for the winter season; LoaderLight illuminates the implements while working in the dark.

LoaderLight™ contains two 10 W heavy duty LED lamps (2x1052 lumen), 12 V and 2x0,75 Ampere, IP68. Compatible with all other options except 4th function and ESV valve.
