

MASSEY FERGUSON

THE GENUINE CHOICE

ACCESSORIES

RANGE OVERVIEW

A red Massey Ferguson tractor is shown from a front-three-quarter perspective, driving on a paved road. The tractor has large, treaded tires and a prominent front grille with the Massey Ferguson logo. A driver is visible in the cab. The background consists of green trees and a clear sky. The image is split vertically down the middle, with the left half being semi-transparent to allow text to be overlaid.

Genuine Massey Ferguson Accessories
are engineered to deliver high levels of
performance and reliability to support the
world's farmers.

GENUINE MASSEY FERGUSON DEALER FIT ACCESSORIES

ACCESSORY HIGHLIGHTS

Weights

An integral part of setting up the machine is ensuring the correct ballast is used. AGCO Parts offer a range of genuine weights engineered by Massey Ferguson, providing durable optimum ballast for your Massey Ferguson tractor.

Linkage and Power Take Off

Massey Ferguson engineered and approved range of fully integrated linkage and PTO's provide the assurance that all components have been tested and approved to meet tolerance and performance specifications and won't let you down.

Rear Hitches

There's a wide range of hitch solutions available, from auto-hitch installations to towing pintels. All engineered to ensure robust and reliable hitching of your implement or trailer.

Spool Valve Kits

Retro fit and replacement spool valve kits enable the versatility of your Massey Ferguson to be fully utilised by increasing the number of hydraulic services it can perform.

Fenders and Mudguards

Whether it is to upgrade or for a repair, AGCO Parts have a range of genuine Massey Ferguson front fender kits and rear mudguard solutions.

Auxiliary Lighting

Rotating beacons and work lamps to ensure you can be seen as well as see the job at hand.

Operator Environment

From radio and camera system installations to air conditioning kits and genuine Massey Ferguson seating, all designed to further enhance the operators environment. Be prepared for any eventuality by installing a first aid kit, fire extinguisher and warning triangle, all available through AGCO Parts.

Baler Accessories

Exclusive to the Large Square Baler, a range of Hesston factory engineered and approved kits to assist productivity are available. Electronic bale weight and length kits can be controlled from the comfort of the cabin. There are also convenience features such as the hitch extension, rear camera and hydraulic parking jack. These accessories are applicable to both the MF 2100 and 2200 series balers.

TECHNOLOGY SOLUTIONS SUMMARY

Around 80% of farming costs are variables costs such as fuel, fertilizer, seeding material etc. By using guidance you can improve productivity and reduce these costs.

Auto-Guidance key features include:

- Auto-Guide™ 3000 – Automatic steering system
- Maximum use of implement width by reducing overlap
- Optimal spacing of plant/seeding material
- Optimal performance in all light conditions
- A full range of upgradeable accuracy options, to suit applications from spraying and stubble management to row cropping:

Auto-Guide™ 3000 receiver enables the use of EGNOS free sub-metre accuracy correction signals. This can be upgraded up to RTK centimetre accuracy for seeding and planting.

Standard (Free)	EGNOS	+/- 30cm
Subscription	VBS	+/- 20cm
Subscription	HP	+/- 5cm
Subscription	RTK	+/- 2cm
Base station	HiPer Ag RTK	+/-2cm
